***Opening Address for the 4th International Postgraduate
Research Colloquium
June 19, 2007***

by The President of Srinakharinwirot University

Director of Behavioral Science Research Institute, faculty delegates from International Islamic University Malaysia (IIUM), various domestic and international universities, keynote speakers, and honorable guests:

I am very pleased to be presiding over the opening of the 4th International Postgraduate Research Colloquium today. I would like to congratulate the Behavioral Science Research Institute for organizing this International Postgraduate Research Colloquium once again, after collaboratively alternating as host with International Islamic University Malaysia (IIUM) for the previous 3 consecutive Colloquiums, each of which have been highly successful. In this globalization era, in which nations worldwide can communicate, exchange, and connect to an integrated and limitless range of information, knowledge, and experience. Development of graduate students to be knowledgeable and universal persons in viewpoint and vision of research study is one important area to be encouraged. This International Postgraduate Research Colloquium thus represents a forum for synergy of ideas among academics, researchers, domestic and international graduate students/ graduate students to exchange ideas, knowledge, experience, and cultures; as well as the development of students' universal potentials.

Srinakharinwirot University wishes to thank Behavioral Science Research Institute, International Islamic University Malaysia and all members of the Organizing Committee who cooperatively organize this colloquium; and to thank all honorable speakers, academics and researchers from various academic institutions who bring research works for dissemination and to exchange knowledge and ideas. I wish the colloquium will proceed the successful achievement of all objectives; and would like to take this opportunity to open The 4th International Postgraduate Research Colloquium at this time.

Welcome message
by Director of Behavioral Science Research Institute

President, faculty delegates from International Islamic University Malaysia (IIUM), various domestic and international universities, keynote speakers, and honorable guests:

I am delighted and honored that all of you attend this International Postgraduate Research Colloquium today, which has been organized continually for the 4th year. Firstly, I would like to retrace the important motives that transpire organization of such colloquiums. This was initiated by Assoc. Prof. Phachongchit Intrasuwan, former director of Behavioral Science Research Institute, who sought to expand our Doctoral Research Degree Program into an international degree program. At the same time, the policy direction of the university is to develop Srinakharinwirot University into a Research University. The establishment of the Institute's Doctoral Research Degree Program was thus pertinently consistent with the university's policy direction.

To successfully achieve the aforementioned objectives, the institute sought collaboration from academic institutes overseas, which received exceptional response and cooperation from International Islamic University (IIUM) Malaysia along with other domestic universities. Dialogues and discussions led to mutual agreement that collaborative efforts should begin with academic exchange first, resulting in the first colloquium in 2004, which the IIUM hosted. In that colloquium, the Institute allowed the By-Research PhD candidates class 1 to present research works. After that, colloquiums were organized continually for the 2nd and 3rd time in subsequent years, which still maintained the original objectives for organizing the events, i.e. academic exchange and collaboration on developing the Doctoral Research Degree Program into an international degree program, but with expansion of scope to have faculty of the institute to participate in presentation of research projects also. For this 4th colloquium, which Srinakharinwirot University hosts, an additional objective is to build networks with other universities in Thailand to encourage academic exchanges in a wider circle, allowing for free/unrestricted/volunteer research works presentation. For later occasions, other universities may wish to be represented or to collaborate as event host and progress toward higher collaborative efforts, such as faculty exchange or joint advisors on students' dissertation both domestic and international.

Srinakharinwirot University and the Behavioral Science Research Institute welcome all of you to the 4th International Postgraduate Research Colloquium, and hope that you will receive utmost benefits from attending this colloquium.

Welcome message
by Chairman, Doctoral Research Degree Program

President, Director of Behavioral Science Research Institute, faculty delegates from International Islamic University Malaysia (IIUM), various domestic and international universities, keynote speakers, and honorable guests:

I, as Chairman of Doctoral Research Degree Program, would like to mention the prominent attributes of this degree program and beneficial support gained from past colloquiums. The Doctoral Research Degree Program was established with main objectives to develop potentials of those with existing knowledge of research to be more efficient researchers and with knowledge in Behavioral Science. The Program is a no coursework : students are required to carry out two research projects and one dissertation to complete the program within 5 years, during which time students have expert faculty to consult and advise closely. From this attribute, one can see that it is fully consistent with the policy direction of Srinakharinwirot University to develop into a Research University. Presently, the institute has 5 Classes/ batches of Doctoral Research Degree Program students; 1 student in the Class 1 has successfully graduated.

The 3 past colloquiums represent forums for students to develop skills in research works presentation. Hearing comments and criticisms from panel list from various disciplines and listening to academic lectures from expert keynote speakers broaden horizons and diversify the students' worldwide perspectives. Students have opportunities to develop skills in research works with international academics directly, able to apply the advice, knowledge, and novel experience obtained toward improvement of research works and dissertation for greater efficiency. Moreover, the institute receives strong academic support from IIUM and other international universities, with constant and continual exchange of academic information, plus cooperation from faculty members of those universities as joint advisors on students' dissertation.

This is another occasion for an academic colloquium to help develop potentials of participating students and researchers from Behavioral Science Research Institute, IIUM, and other universities; including a good opportunity to expand academic collaboration with other universities in Thailand. I gratefully welcome you all to The 4th International Postgraduate Research Colloquium. Thank you.

“The 4th International Postgraduate Research Colloquium”

About Behavioral Science Research Institute (BSRI), Thailand

Background

The Behavioral Science Research Institute, originally known as the International Institute for Child Study, was established in cooperation with the Ministry of Education and UNESCO in August, 1955, with three main objectives: 1) Conducting comparative research on child development, 2) Training Thai and overseas researchers to be able to conduct research as well as instilling knowledge and understanding about children, and 3) Disseminating research findings to improve education and socialization in school and at home.

In 1974, the institute's name was changed to "Behavioral Science Research Institute", with status equivalent to that of a Faculty of the university, with the principal responsibility of conducting research and teaching, training, and providing academic services to society.

Research at the institute in the period after the year 1974, has focused on the integration of concepts and theories of several disciplines—e.g. psychology, sociology, anthropology, political science, and education, to help explain, predict and develop individual behaviors. The institute also disseminates academic knowledge and provides training in behavioral science theory and research methodology. In 1984, the institute started offering the Master's Degree Program in Applied Behavioral Science Research. Later, this program was extended to a Doctoral Degree in the same discipline. The program started accepting students since 1994. In addition, the institute launched the Doctoral Research Degree Program in Applied Behavioral Science Research in 2002.

Vision

"The Behavioral Science Research Institute is an organization of international excellence in behavioral science research. The objectives are to create body of knowledge, and apply toward improvement of Thais' quality of life; and to produce researchers who are competent in approaching problems from various perspectives, moral, and eager to learn; in addition to providing knowledge, service, and proposing guidelines for prevention and solution of social problem; as well as cooperation with other domestic and international organizations on academic development through teamwork, empowerment, and promotion of personnel morale."

Philosophy

“Develop knowledge in conjunction with moral principles toward quality of life”

Endeavor

“The Behavioral Science Research Institute endeavors to conduct research and produce graduates toward improvement of Thais’ quality of life”

Objectives

1. researches to create body of knowledge in behavioral science and quality of life improvement of individuals and society.
2. produces graduates who are competent in behavioral science research, and ethics.
3. enhances research atmosphere and stimulates cooperation in multidisciplinary research.
4. disseminates academic knowledge and provides behavioral science research training.

About the Department of Psychology, International Islamic University Malaysia (IIUM)

Background

The Department was established in 1990 to undertake programmes which are innovative and methodologically unique. It provides world-class teaching, practical international experience in the field of psychology and a unique chance to share develop the vision, knowledge, initiative and critical thinking needed to meet professional challenges and civilizational needs.

The Department adheres to the general vision and mission of the University and it aims to provide students with knowledge, interpersonal skills and Islamic values. A unique feather to be found in all the programmes in the Department is the Islamization component. The Department offers specialization in test and measurement at the Master's and PhD levels that are not offered elsewhere in the Peninsula of Malaysia.

Vision

"To become a source of referral in integrated research and teaching of psychology"

Mission

"To be a department that provides high quality and integrated education, training and research with the aim of improving the quality of life of the ummah.

Facilities

- Two experimental psychology labs for psychophysiology, learning and perception
- One lab for psychodiagnostics and clinical assessments
- Two labs for counseling and psychotherapy
- A computer lab for research, experimental work and quantitative analysis

Programmes Offered

- BHSc with Honors in Psychology – *Developmental Psychology, Social Psychology, Adolescent Psychology, Psychometric Principles, Statistics, Culture and Psychology, Abnormal Psychology, Forensic Psychology, Substance Abuse, Personnel Psychology, Organizational Psychology, Ergonomics, Group Counseling, Sport Psychology, Undergraduate Seminar of Islamic Perspective of Psychology*
- MHS (Psychology) by Coursework and Research
 - Clinical Psychology
 - Counseling Psychology
 - Industrial/Organizational Psychology
- PhD (Psychology) by Research

Schedule for Research Presentation
